EDUCATION

- Electrical & Computer Engineering**, University of Waterloo 2025 – present | Waterloo, Canada
- Master of Applied Science in Electrical & Computer Engineering
- Software Engineering**, University of Calgary 2018 – 2023 | Calgary, Canada
- Bachelor of Science in Software Engineering with Distinction.

PROFESSIONAL EXPERIENCE

- Associate Machine Learning Developer**, AltaML | Venture Team May 2025 – Aug 2025 | Waterloo, Canada
- Prototyped agentic LLM workflows using **AltaML's LogicStream (AutoGen-based)** to extract structured data from medical documents with **Tesseract OCR** and models like **GPT, LLaMA, DeepSeek, and Mistral**.
 - Developed **Azure deployment scripts** to automate hosting of containerized **FastAPI backends** and **Next.js frontends** on Azure Web Apps.
 - Built evaluation modules for comparing **FHIR-standardized data** with extractor outputs using **difflib fuzzy matching** to assess accuracy.
 - Co-designed a **Healthcare Provider pipeline**, integrating **Selenium, BeautifulSoup, Serper API, DocuSign, and Gmail APIs** to automate clinic discovery, consent signing, and secure medical record requests.
- Associate Machine Learning Developer**, AltaML | Invent Team May 2023 – Sep 2023 | Calgary, Canada
- Increased the client's yearly revenue by **5 million dollars** by designing, building, and optimizing an **ETL pipeline** in **Python** to automate their ongoing Machine Learning (ML) use case, which forecasts turnover rates of over **15 million customers**.
 - Increased model accuracy from **72% to 83%** by employing meaningful data processing and model training.
 - Developed an innovative copilot tool using **Prompt Engineering** with cutting-edge **LLM** technology, the **text-DaVinci-003** model from OpenAI, to enhance non-technical employees' interactions with **Airtable**.
 - Leveraged **Azure Cloud** Machine Learning services to develop, manage, and test the **ETL pipeline**, and perform warehousing and versioning for 3 datasets with **600,000** samples each.
- Software Engineer Intern**, Mobility Quotient | Analytics Team May 2021 – May 2022 | Calgary, Canada
- Leveraged the XXAMP tech stack** for **web scraping** on client e-commerce sites using **PHP and Guzzle**, displaying data on Sokolocal for 100+ local businesses.
 - Engineered **robust test suites** and **end-to-end tests** for 10+ projects, ensuring web page functionality using **Selenium**.
 - Utilized **XML sitemaps** to navigate and scrape **500+** web pages, ensuring comprehensive data acquisition.

SKILLS

Programming — Python, Java, C++, C#, JavaScript, REST APIs, PostgreSQL, MongoDB

Tools and Platforms — Git, Docker, Azure Cloud, AWS, Jira, Scikit-learn, PyTorch, PySpark, Linux, OpenGL, Spring, JUnit

PROJECTS

- ScholarSpace**, Online Learning Social Media Platform 2024 – present
- Designed an innovative online learning platform with social media features using the **MERN stack (MongoDB, Express.js, React.js, Node.js)** and **Apollo GraphQL**. Employed **MongoDB** with **Mongoose ORM**.
 - Implemented secure authentication systems, including **JWT** and **Google OAuth** integration for registration and login.
 - Created dynamic **user profiles** for managing posts and personal information, with **advanced search functionality** for finding posts by keywords, categories, or topics.
 - Enhanced **social interaction features**, enabling users to like, comment, and share posts.
 - Utilized **Git** for version control and **ESLint/Prettier** for code linting and formatting, ensuring high code quality.
- Flexiform CAD Application**, Engineering Capstone Design Project 2022 – 2023
- Developed a web-based computer-aided design (**CAD**) **tool** with a team of 5 engineers to simplify prosthetic **mesh editing** for hand amputees. Utilized **Unity game engine, C#, and WebGL** for web-based implementation.
 - Implemented **12+ features**, including mesh filling and casing features, and designed an **intuitive UI** for seamless mesh modification.
